

Annexin V Binding Buffer

Substrate and Assay Reagents

Product Information

Product No.: A433

Storage: 2° to 8°C

Product Description

Background:

Annexin V Binding Buffer has been formulated for flow cytometric labeling of apoptotic cells with Annexin V reagents. The buffer is provided as a ready-to-use solution. Annexin V Binding Buffer is recommended for use with Annexin V reagents. Cells should be resuspended in Annexin V Binding Buffer at a concentration 1x10⁶ml and then combined with Annexin V reagents at the recommended volumes.

Storage and Stability

This product is guaranteed for twelve (12) months when Store at 2 to 8°C.
