

UltraCoat™ ELISA Plate Coating Buffer 10X

Substrate and Assay Reagents

Product Information

Product No.: C100

Storage: Sterile 2 to 8°C

Product Description

Background:

Maximize the success of your ELISA experiments with UltraCoat™, a proprietary coating buffer formulated to optimize antibody and antigen binding to polystyrene plates. By maintaining the ideal pH and ionic strength, UltraCoat™ ensures superior protein immobilization and preserves their 3D structure for enhanced functionality. This translates to increased specific binding, reduced background noise, and ultimately, more accurate and reliable ELISA results. Elevate your research with Leinco's UltraCoat™ and unlock the full potential of your ELISA assays.

Storage and Stability

Store at 2-8° C. **Do Not Freeze**

Country of Origin

USA
