

Purified *In vivo* Grade Antibodies

Leinco's GOLD™ & PLATINUM™ Purity Standards

Leinco Technologies has developed proprietary methods for manufacturing *In vivo* functional grade antibodies with the highest purity standards in the industry. Leinco's *In vivo* Platinum™ antibodies have the most stringent quality specifications for purity, endotoxins, aggregates and leachable protein A. Each antibody is available in custom concentrations and package sizes. *In vivo* Platinum™ antibodies are also pathogen free and tested by the IDEXX Impact I PCR mouse pathogen profile.

GOLD™

- Purity, > 95%
- Endotoxin, ≤ 1.0 EU/mg
- Contains no preservatives or carrier proteins
- Sterile PBS Ph 7.2 - No K or Ca
- For highly sensitive assays where large amounts of antibody are needed.

PLATINUM™

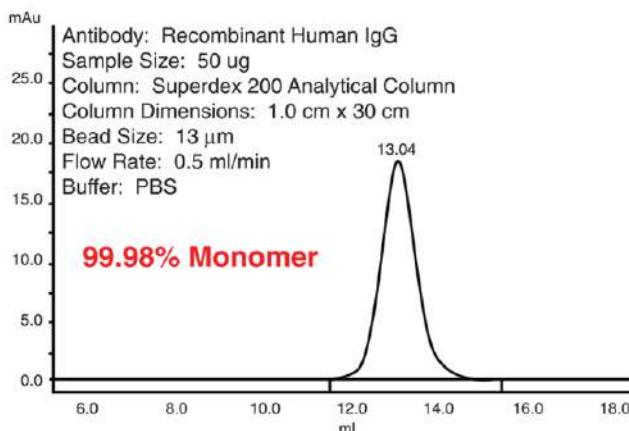

- Purity, > 98%
- Very low endotoxin, ≤ .05 EU/mg
- Contains no preservatives or carrier proteins
- Sterile PBS Ph 7.2 - No K or Ca
- Ultra-low levels of leached protein A
- Pathogen tested. (IMPACT1)
