UltraWash™ Buffer - PBS 20X

Reagents for Assay Development

Product Information

Product No.: W220

Product Description

Background:

UltraWash™ Buffer - PBS 20X aids in lowering background noise. It is used in assays to wash and reduce nonspecific or unbound antigen/antibody, enzyme conjugate, sample and standard from the surface of substrate involved in ELISAs.

Storage and Stability

The undiluted solution should be stored at room temperature for long term storage to avoid salt crystallization. Handle product aseptically to avoid risk of contamination. Avoid repeated freeze-thaw cycles.

Country of Origin

USA

Products are for research use only. Not for use in diagnostic or therapeutic procedures.
