

Flow Cytometry Support Tools

Leinco understands that quality and price are priorities for researchers and core managers regardless of their intended application. Our flow cytometry antibodies & support tools have been developed and produced to exceed all expectations.

Our sheath fluid products are designed for flow cytometry and are balanced salt solutions which provide an environment that maintains the structural and physiological integrity of cells. Depending on experimental needs, different formulations of sheath fluid and balanced salt solutions can be used. We provide many standard options as well as custom solutions for each individual core or researcher. For example, our ClearFlow™ & ClearSort™ Preservative Free solutions are specifically formulated isotonic solution for transporting particles through a flow cytometer. We manufacture all of our solution in our ISO 7 (class 10,000) clean room suites, use a multi filtration method, and use Type I Grade (ultrapure) quality water for low particulate count which minimizes fluorescence background to guarantee better signal to noise ratio measurements.

How Leinco Delivers High Quality & Cost Savings

- 1 **Manufactured** in state-of-the-art cGMP, ISO certified facilities located in St. Louis, MO.
- 2 **Quality Control** of every lot and reliable deliverability every month.
- 3 **Buy in Bulk** and save up to 40% on shipping and material cost.
- 4 **Concentrated Options** allows for additional savings on shipping.
- 5 **Custom Options** delivered in bioprocess bags, hanging bags and other fluid transfer environments gives you the flexibility.

Flow Cytometry Support Tools and Sheath Fluid

Product	Pkg. Sizes	Prod. No.
ClearFlow™ Sheath Fluid	20L	S621
ClearFlow™ Sheath Fluid with Surfactant	20L	S644
10X ClearFlow™ Sheath Fluid	2 x 1L, 4 x 2L, 2 x 10L, 20L	S622
10X Preservative-Free ClearSort™ Sheath Fluid	4 x 1L, 4 x 4L	S632
HEPES buffered saline with EDTA (10X)	4 x 1L	H1679
1X ClearSort™ Sheath Fluid	4 X 4L	S648
1X ClearSort Saline Solution NS	20L	P373
PBS, 1X	1L, 100L, 4 x 1L, 4 x 4L	P364
PBS, 10X	1L, 4 x 1L, 4 x 4L	P349
FCM Staining Buffer (BSA)(10X)	1L	F1175
10X Fixative Buffer	100 ml	F1194
7-AAD Viability Staining Solution	200 tests, 500 tests	A431
RBC Lysing Buffer 'Ready To Use'	100 ml	R1364
Propidium Iodide (PI)	4 X 1L	P367
Human RealStain Fc Block Solution	100 tests, 200 tests	R5151
10X DPBS, no calcium, no magnesium	1.0 L, 4 x 1L	D388
