

In Vitro Diagnostics Raw Materials

Let Leinco Technologies meet your needs for critical In vitro Diagnostic (IVD) raw materials. Our proven track record of producing high quality antibodies, proteins, and reagents in large quantities makes us an excellent partner for any diagnostic assay. Choose from our curated catalog of “off-the-shelf” reagents or partner with us to develop custom reagents to meet the exact needs of your assay. Our commitment to quality is exemplified by our adherence to cGMP standards including ISO 9001:2015 and ISO 13485:2016. This means that finished products will have exceptional lot-to-lot consistency to meet all your expectations and requirements. All of our purified products (antibodies and proteins) undergo our standard bioanalytical testing procedures to ensure their purity meets our stringent specifications.

Infectious Disease Targets

Acinetobacter	Influenza B	P. falciparum
Adenovirus	Giardia	Plasmodium
Andes virus	Group A Strep	Rickettsia
Avian Influenza	Group B Strep	Rift Valley Fever Virus
Candida	Henipavirus	Ross River Virus
Chikungunya	Human Immunodeficiency Virus (HIV)	Rotavirus
Chlamydia	Human Papillomavirus (HPV)	Respiratory Syncytial Virus (RSV)
Clostridium Diff	Herpes Simplex Virus (HSV)	Salmonella
Cytomegalovirus (CMV)	Japanese Encephalitis Virus	Shigella
Covid-19	Listeria	Sin Nombre Virus
Cryptosporidium	Marburg	T. pallidum
Dengue	Metapneumovirus	T. vaginalis
E. coli	Monkeypox	Vaccinia Virus
Ebola	Mycobacterium	West Nile Virus
Epstein-Barr Virus (EBV)	Mycoplasma genitalium	Yellow Fever
Eastern Equine Encephalitis Virus (EEEV)	N. gonorrhoeae	Zika Virus
Entamoeba	Norovirus: G1	
Influenza A	Norovirus: G2	

Hormones

Testosterone	Triiodothyronine (T3)
Progesterone	Human Follicle Stimulating Hormone β (FSH)
Human Chorionic Gonadotropin β (hCG)	Human Luteinizing Hormone β (LH)
Human Thyroid Stimulating Hormone β (TSH)	Cortisol
Thyroxin (T4)	

FemTech and STI

Chlamydia	Human Immunodeficiency Virus (HIV)	N. gonorrhoeae
Cytomegalovirus (CMV)	Human Papillomavirus (HPV)	PAPP-A
Epstein-Barr Virus (EBV)	Herpes Simples Virus (HSV)	T. pallidum
Group B Strep	Mycoplasma genitalium	T. vaginalis

Secondary Antibodies/Controls

Human Ig Kappa Light Chain	Human IgG Fc Specific
Human Ig Lambda Light Chain	Murine IgG2b
Human IgE	

Drugs of Abuse

Xylazine

Cardiac

Troponin I
NT-proBNP
ApoE2, 3, 4

Coagulation

D-Dimer

Buffers and Substrates

UltraBlock-FISH	Stop Reagent
UltraWash	TMB Substrate Solution

Inflammation

IL-6
IL-8
IL-10
