Anti-VSV-G

Polyclonal

Product Information

Product No.: 18874

Product Description

Specificity:
Goat Polyclonal Antibody specific to VSV-G.

Background:
The Vesicular Stomatitis Virus Glycoprotein (VSV-G) epitope tag is represented by the sequence YTDIEMNRLGK. This tag is often included in recombinant proteins to facilitate identification and isolation of those proteins.

Format:
Purified

Immunogen:
Synthetic peptide YTDIEMNRLGK conjugated to KLH.

Formulation
PBS, pH 7.2, 0.09% sodium azide.

Storage and Stability
This antibody is stable for at least one (1) year at 2-8°C.

Products are for research use only. Not for use in diagnostic or therapeutic procedures.

410 Axminister Dr, St. Louis, MO 63026 (800) 538-1145 leincoglobal@leinco.com

Product Preparation
Purified by peptide affinity chromatography

Applications
Applications and Recommended Usage (Quality Tested By Leinco):

Immunoblotting: use at a dilution of 1:1,000- 1:20,000

Immunocytochemistry: use at a dilution of 1:100-1:400.

Immunoprecipitation: use 1-4ug/mg lysate

ELISA: for detection use at a dilution of 1:1,000-1:30,000; for coating use at a dilution of 1:100-1:500.

These are recommended dilutions.

End users should determine optimal dilutions for their applications.

Country of Origin
USA

Products are for research use only. Not for use in diagnostic or therapeutic procedures.
