

Tumor Necrosis Factor α Antibody

Monoclonal Antibody

Product Information

Product No.: 21301

Clone: 2C8

Isotype: Mouse IgG1

Storage: Sterile 2° to 8°C

Product Description

Specificity:

21301 [Clone 2C8] is effective in inhibition of the biological activity of recombinant and natural TNF α . 21303 [Clone F6C5] recognizes a different epitope on TNF α than 21301.

Known Reactivity Species:

Human

Format:

Purified

Immunogen:

Human recombinant tumor necrosis factor of alpha type

Formulation

PBS, pH 7.4, 0.09 % sodium azide (NaN₃)

Storage and Stability

This antibody is stable for at least one (1) year at 2° to 8°C.

DO NOT FREEZE

Product Preparation

Purified by Protein A affinity chromatography

Applications

Applications and Recommended Usage (Quality Tested By Leinco):

21301 [Clone 2C8] may be used in biological assays to inhibit activity of TNF α .

This antibody may be used in immunoassays or in immunohistochemistry to detect and/or quantitate TNF α .

Other Applications Reported in Literature:

ELISA,

IHC

Country of Origin

USA
